

Ceetec A250-8

Reliable and user-friendly painting machine for 250x250 materials

The Ceetec A250 machine is the medium-sized machine in the painting machine range and is particularly suited for large craftsman's workshops, such as those of painters, carpenters, timber yards as well as factories with some or significant production. The machine is usually used as a manual machine, i.e. with manual feeding and removal. If integration into a production line is necessary, we recommend our Ceetec Industry range.

Profiles:

Technical data

Capacity	18 metres/m - 42 metres/m
Material dimensions	250 x 250
Number of brushes	8
Number of nozzles	13
Power consumption	16A
Power supply	3 x 400V + PE + IP class 54
Inlet height	900 mm (+50 mm)
Machine weight	550 kg
Length x width x height	2200 x 1000 x 1550
Inlet direction	Left to right

The painting machine ensures a consistent quality

The wooden object is fed horizontally through the machine by means of automated feeding. The machine provides a high and consistent finish as it is equipped with eight individually adjustable rotating brushes.

Excess paint is recirculated in a close circuit through a filter and back into the container. The closed circuit ensures optimum use of the paint.

The machine is delivered complete with brushes and filter bags and is ready for use as soon as it is connected to the power source. The Ceetec A250 is a standard machine and, thus, also a stocked item which may usually be delivered from day to day.

Extra equipment may be purchased, such as inlet and outlet roller conveyors, other types of brushes, guides for short items as well as racks for laying down wooden objects. Moreover, a brush arrangement may be purchased for removing dust, dirt and shavings. This is particularly useful when working with sawn timber.

Maintenance and spare parts

The Ceetec A250 is easy to clean and maintain. You can change the nozzles, brushes and other wearing parts yourself. We naturally stock all spare parts which means that your painting machine will always operate efficiently and exceptionally reliably.

Did you know that,

Ceetec machines are developed and manufactured locally on our factory in Nr. Åby in Funen.

Ceetec is a family-owned, Danish company, owned by Janni and Jesper Frandsen.

Ceetec has delivered quality machines to the timber industry since 1970.

Ceetec has its own YouTube channel where you can find "how to"-videos and customer projects.

Advantages of the Ceetec A250

- High productivity
- Consistent high-quality finish
